

Asset-Light Quick Commerce Infrastructure

Empowering 15 Million Kiranas with 15-Minute Hyperlocal Commerce

While dark-store operators burn hundreds of crores building capex-heavy warehouses, LocalKart turns existing neighborhood mom-and-pop stores into high-velocity digital fulfillment hubs.

The Broken Economics of Dark-Store Quick Commerce

Centralized dark stores are unsustainable, predatory on margins, and displacing local livelihoods.

1. Crippling Capex & Cash Burn

Zepto & Blinkit spend ₹30L to ₹50L capex per dark store on commercial leases, refrigeration, and warehouse staff, leading to severe cash burning.

2. Margin Extraction (15% to 25%)

Traditional aggregators charge huge commissions that wipe out the thin 8-12% margins of neighborhood Kiranas, displacing 15M+ family livelihoods.

3. Tier 2/3 Geographic Failures

Dark stores fail completely in Tier 2, Tier 3, and suburban India where order density cannot sustain ₹50L warehouse setups, leaving 80% of India unserved.

The Reality: Indian Grocery Retail is 90% Unorganized & Offline

Kiranas are already located within 500 meters of every household in India. Why build new warehouses?

15M+ Kiranas

LocalKart: Decentralized Hyperlocal Commerce Grid

An asset-light software layer converting existing kirana inventory into 15-minute fulfillment nodes.

Zero Dark-Store Capex

Zero real estate leases, zero inventory risk. We orchestrate existing kirana inventory via mobile ERP and real-time cataloging.

Asset-Light

0% Commission SaaS

Kiranas keep 100% of their product margins. We charge a flat micro-SaaS fee (₹299/mo), building fierce merchant loyalty.

Merchant-First

15-Minute Local Dispatch

Because physical kiranas are 300-800m away, riders pick up and deliver in 12-15 minutes with zero traffic hurdles.

Sub-15 Min

Precision Geohash Engine

Polygon geofencing down to 150-meter base32 geohashes maps actual street routing, eliminating address ambiguities in Indian neighborhoods.

Unified Multi-Store Cart

Customers can order milk from Dairy, snacks from Kirana, and medicines from Chemist in a single order routed to one rider.

Production-Ready 4-Sided Monorepo (Live in Browser)

100% architected, coded, compiled, and deployed by a solo engineer in Bengaluru.

Customer App

Sub-second store discovery, real-time cart syncing, live GPS tracking.

[message-23b1d-a8e7b.web.app](#)

Merchant App

Instant inventory toggle, audio order notifications, virtual billing ledger.

[message-23b1d-store.web.app](#)

Rider App

15s countdown modal with persistent radar siren, battery-optimized routing.

[message-23b1d-delivery.web.app](#)

Admin Panel

Interactive polygon geofence mapping, cluster order health analytics.

Predictable, Sustainable SaaS & Platform Monetization

Aligning incentives with local businesses for high margins and zero customer subsidy burn.

60%

Micro-SaaS Subscriptions

Flat ₹299 – ₹499/month charged to kirana stores for software access, catalog digitization, and order management dashboard.

20%

Hyperlocal Sponsored Ads

FMCG brands (Amul, HUL, Britannia) and local specialty shops pay for top-ranking carousel slots inside specific pin-codes.

20%

Platform & Fintech Fees

₹2 - ₹5 platform convenience fee per order from customers + NBFC commissions for underwriting micro-credit to merchants.

💰 Dark Store vs LocalKart Unit Economics

- ✓ **Capex per Store:** Zepto ₹40 Lakhs vs LocalKart **₹0** (Existing kiranas)
- ✓ **Inventory Risk:** Zepto 100% at risk vs LocalKart **0%** (Merchant owned)
- ✓ **Customer Acquisition (CAC):** Paid ads ₹350+ vs LocalKart **₹15** (Storefront QR codes)

📈 Viral Countertop QR Growth Loop

Every kirana places a branded LocalKart QR on their counter. Their existing daily footfall of 150+ walk-in customers downloads the app for instant reorders — giving us **virtually zero CAC**.

Capturing India's \$1.2 Trillion Retail Economy

A massive untapped greenfield market in Tier 1 neighborhoods and Tier 2/3 clusters.

\$1.2T

TAM: Indian Retail Market by 2030 (90% unorganized)

\$120B

SAM: Digital Hyperlocal Addressable Market across India

\$1.5B

SOM: LocalKart 5-Year Target (5% of regional clusters)

ONDC Alignment

LocalKart acts as a certified Seller-Side Gateway on ONDC, allowing local merchants to receive orders from Buyer apps like Paytm, PhonePe, and Magicpin.

IN The Bharat Expansion Vector

While incumbents are locked in an expensive price-war in metros, LocalKart's asset-light model deploys profitably in Tier 2/3 hubs from Day 1.

24-Month Execution Trajectory

Clear operational milestones driving to rapid operating breakeven.

PHASE 1 (Months 1–6)

Bengaluru Pilot Clusters

- ✓ 100 Active Kirana Partners in HSR & Koramangala
- ✓ 1,500 daily deliveries
- ✓ Cash breakeven in pilot clusters

PHASE 2 (Months 7–12)

Karnataka Expansion

- ✓ 1,000+ Active Merchants
- ✓ 15,000+ daily deliveries
- ✓ Micro-credit rollout with NBFC partners

PHASE 3 (Months 13–24)

Multi-City Scale

- ✓ 10,000+ Onboarded Kiranas
- ✓ ₹150 Cr+ Annual GMV Run-rate
- ✓ EBITDA positive operations

Serverless Economics = Infinite Scale at Negligible Cost

Cloud architecture scales to zero when idle. Infrastructure cost is less than ₹0.15 per order, ensuring gross profit margins remain above 75%.

Raising ₹75 Lakhs (~\$90K USD) Pre-Seed

Accelerating pilot rollout across Bengaluru commercial clusters and merchant acquisition.

🎯 Use of Pre-Seed Capital

- ✓ **Cluster Operations & Ground Team (45%):** Onboarding 100+ kiranas & rider fleet in Bengaluru.
- ✓ **Merchant QR Kits & Collateral (30%):** Branded countertop QR stands, merchant kits, local awareness.
- ✓ **Engineering & ONDC Pipeline (15%):** Enhancing real-time geofence polygon mapping & gateway.
- ✓ **Regulatory, Legal & Buffer (10%):** Entity structuring and working capital reserve.
